

For predictive, generative and agentic AI. Frame one opportunity, then use sheets 1-7 to explore its dimensions.

PROJECT / OPPORTUNITY / PEOPLE / DATE

FICTIONAL TEACHING EXAMPLE | Procurement comparison | Planned offline experiment | W1-W3 = relative project weeks | No measured results

Write conclusions here. On the detail sheets: + strength; - gap; ? unknown. These are discussion prompts, not a total score.

GO

Opportunity

Problem / people / intended value
Alternatives / priority / scope

CONCLUSION / KEY EVIDENCE / OPEN ISSUE

Compare approved supplier quotes and prepare private drafts. Exclude safety-critical parts, substitutions, supplier contact and purchasing. Compare with the buyer template; consider stock alerts and data cleanup too.

1

Data

Sources & future value / Collect, acquire or label / Quality & coverage
Privacy & permitted use / Storage & access / Lifecycle & reuse

CONCLUSION / KEY EVIDENCE / OPEN ISSUE

Synthetic inputs first. Proprietary quotes may reach providers via the agent. Check training use, retention, access and exceptions before uploads. Preserve permitted corrections and outcomes for future use.

2

The AI team

Domain expertise / Technical skills / Communication & design
Obtain expertise / Retain & develop / Capacity & continuity

CONCLUSION / KEY EVIDENCE / OPEN ISSUE

Procurement, buyer, engineer, IT, data/security and evaluation roles are needed. Reserve reviewer time; resolve evaluation skills and live support before expanding.

3

Organising AI development

Position the team / Decision authority / Portfolio & timing
Existing service or product / Build, partner or acquire / Agility & operations

CONCLUSION / KEY EVIDENCE / OPEN ISSUE

Procurement leads; shared IT/security supports. Compare platform configuration, internal build and partnership. Select delivery after evidence and cost checks.

4

Technologies

Approach & simpler baseline / Model sourcing & adaptation / Performance & explainability
Human involvement / Hosting & infrastructure / Integration & lifecycle

CONCLUSION / KEY EVIDENCE / OPEN ISSUE

Compare simple template and model options. No model selected; no fine-tuning justified yet. Read/compare/draft offline; technical denial tests still required.

5

KPIs & value

Strategic outcome / Customer & user value / Process & people
Financial value / Model performance / Evidence & review

CONCLUSION / KEY EVIDENCE / OPEN ISSUE

30 held-out packages; illustrative 95% critical-field target and complete test-conflict flags. Measure review/rework time against the template. No results, savings or stockout benefit claimed.

6

Risk level & benefits

Performance uncertainty / Bias, ethics & safety / Security & resilience
Strategic dependence / Benefits & acceptable risk / SWOT & portfolio fit

CONCLUSION / KEY EVIDENCE / OPEN ISSUE

Assess suitability, bias, data disclosure and dependency. Test ordinary errors and malicious input. No live authority approved. Stop on a serious failure; retain manual handling.

7

Culture & education

AI literacy / Roles & empowerment / Participation & ideas
Shared expertise / Continuous education / Adoption in practice

CONCLUSION / KEY EVIDENCE / OPEN ISSUE

Co-design with buyers and engineers; practise evidence checks and escalation. Preserve expertise. Track correction burden and readiness; fund continuous learning.

NEXT DECISION: explore / pilot / revise / defer / stop | evidence needed / owner / date

EXPLORE OFFLINE. The initial idea of autonomous purchasing becomes a controlled comparison experiment. W1: confirm scope, people and permitted test material. W2: annotate tests, compare options and verify boundaries. W3: review quality, time, costs and user feedback. Procurement lead owns the next decision. Any live pilot requires verified data arrangements and access controls; live orders and payments remain excluded. All thresholds and roles are illustrative scenario choices.

Sources, rights and useful information
PROJECT / OPPORTUNITY / PEOPLE / DATE

FICTIONAL TEACHING EXAMPLE | Procurement comparison | Planned offline experiment | W1-W3 = relative project weeks | No measured results

For each card: choose a status, record your decision and evidence, then identify a strength (+), gap (-) and next action.

1.1 Sources & future value

What exists internally or externally? What outcomes and corrections should we capture now for later uses?

STATUS

? Unknown

Paper III-B.1

SOURCES / MISSING RECORDS / INTENDED FUTURE USE

Use approved specifications and supplier quotes. Link corrections to later delivery and acceptance records.

+ STRENGTH / SUPPORTING EVIDENCE

Existing specification owners.

- GAP / CONSTRAINT

Outcome links not yet designed.

NEXT ACTION / OWNER / DATE

Buyer + data lead: design record links; W1.

1.2 Collect, acquire or label

Compare collection time, purchased data and expert annotation. What permissions, copyright terms and costs apply?

STATUS

? Unknown

Paper III-B.1

ACQUISITION / PERMISSIONS / LABELLING PLAN

Start with synthetic quotes; engineer labels a held-out set. Confirm rights before using real supplier material.

+ STRENGTH / SUPPORTING EVIDENCE

Domain reviewers identified.

- GAP / CONSTRAINT

Annotation effort unmeasured.

NEXT ACTION / OWNER / DATE

Engineer: label five trial packages; W1.

1.3 Quality & coverage

Do volume, variety and freshness fit the task? Which populations, periods, labels or edge cases are missing?

STATUS

- Gap

Paper III-B.1

QUALITY REQUIREMENT / COVERAGE CHECK

Check units, currency, validity and revision. Flag missing evidence; never infer component equivalence.

+ STRENGTH / SUPPORTING EVIDENCE

Required fields can be listed.

- GAP / CONSTRAINT

Formats and revisions vary.

NEXT ACTION / OWNER / DATE

Buyer: audit sample coverage; W1.

1.4 Privacy & permitted use

Can providers train on proprietary inputs or outputs? Check permitted recipients, training use, retention, access and exceptions.

STATUS

? Unknown

2021 + extension

TRAINING USE / RETENTION / RECIPIENTS / ACCESS

Block proprietary uploads until training use, retention and access are checked for the model provider and connected services. Require approved settings and terms.

+ STRENGTH / SUPPORTING EVIDENCE

Synthetic inputs avoid company secrets.

- GAP / CONSTRAINT

Training use and leakage risk unclear.

NEXT ACTION / OWNER / DATE

Data owner: verify training opt-outs and exceptions; W2.

1.5 Storage & access

Where should data live? Consider structure, proximity, transfer speed, security, capacity and administration.

STATUS

? Unknown

Paper III-B.3

STORAGE / ACCESS / ADMINISTRATION CHOICE

Use a restricted project store for approved test files. Compare hosting near users with internal operation.

+ STRENGTH / SUPPORTING EVIDENCE

IT owns access administration.

- GAP / CONSTRAINT

Hosting and access tests pending.

NEXT ACTION / OWNER / DATE

IT: draft storage/access design; W1.

1.6 Lifecycle & reuse

How will sources, versions, corrections and outcomes stay linked? Set retention, deletion and recovery arrangements.

STATUS

? Unknown

Added prompt

RETENTION / PROVENANCE / REUSE PLAN

Version sources and annotations. Retain permitted corrections and outcomes for reuse; set deletion rules.

+ STRENGTH / SUPPORTING EVIDENCE

Future supplier analysis is useful.

- GAP / CONSTRAINT

Retention period undecided.

NEXT ACTION / OWNER / DATE

Data owner: propose retention and reuse rules; W2.

For LLMs: trace prompts, retrieval and provider retention/training. For trained models: separate training, validation and test data.

TAKE TO THE OVERVIEW: main decision / reason / dependency on another dimension

Start with synthetic data. Proprietary quotes/specifications may reach model providers or connected services through the agent. Verify training use, retention, access and exceptions before live input. This constrains hosting (4) and security (6).

PRIORITY GAP OR UNKNOWN / NEXT STEP / OWNER / DATE

Data owner: document product/account settings and terms in W2. Block live uploads until approved; a no-training setting alone does not establish confidentiality.

Capabilities, sourcing and continuity
PROJECT / OPPORTUNITY / PEOPLE / DATE

FICTIONAL TEACHING EXAMPLE | Procurement comparison | Planned offline experiment | W1-W3 = relative project weeks | No measured results

For each card: choose a status, record your decision and evidence, then identify a strength (+), gap (-) and next action.

2.1 Domain expertise

Who understands the task and recognises a plausible but wrong result?
Include people affected by the workflow.

STATUS + Supported Paper III-C

DOMAIN EXPERTS / CONTRIBUTION / AVAILABILITY

Procurement lead owns relevance; buyer and engineer judge terms and suitability. Reserve review time.

+ STRENGTH / SUPPORTING EVIDENCE - GAP / CONSTRAINT

Named domain roles in scenario.

Reviewer time needs booking.

NEXT ACTION / OWNER / DATE

Procurement lead: book reviewers; W1.

2.2 Technical skills

Which statistics, data engineering, modelling and software skills does this project actually need?

STATUS - Gap Paper III-C

REQUIRED SKILLS / NAMED COVERAGE

Use integration, data and evaluation skills for the first experiment. Add adaptation expertise only if needed.

+ STRENGTH / SUPPORTING EVIDENCE - GAP / CONSTRAINT

IT integration support available.

Evaluation capacity not allocated.

NEXT ACTION / OWNER / DATE

IT lead: assign evaluation owner; W1.

2.3 Communication & design

Who translates between specialists and decision makers? Who designs understandable outputs and interfaces?

STATUS ? Unknown Paper III-C

COMMUNICATION / INTERFACE RESPONSIBILITIES

Show source quote, extracted fields and missing evidence beside each comparison. Test with buyers.

+ STRENGTH / SUPPORTING EVIDENCE - GAP / CONSTRAINT

Buyers know the current workflow.

Review interface untested.

NEXT ACTION / OWNER / DATE

Designer + buyer: sketch review view; W1.

2.4 Obtain expertise

Compare upskilling, hiring, partnerships and acquiring a team. Which capabilities must remain internally?

STATUS ? Unknown Paper III-C

SOURCING CHOICE / COST / TIME TO CAPABILITY

Compare internal work with a specialist partner. Retain domain judgement and evaluation ownership internally.

+ STRENGTH / SUPPORTING EVIDENCE - GAP / CONSTRAINT

Internal procurement knowledge.

Partner cost and skills unknown.

NEXT ACTION / OWNER / DATE

Project lead: compare skills and costs; W2.

2.5 Retain & develop

How will people learn, share knowledge and stay? Is time for education and technical investigation funded?

STATUS ? Unknown Paper III-C

LEARNING / RETENTION / KNOWLEDGE-TRANSFER PLAN

Reserve learning time; document data and test decisions. Pair any partner with the internal maintainer.

+ STRENGTH / SUPPORTING EVIDENCE - GAP / CONSTRAINT

Shared project notes proposed.

Knowledge transfer not scheduled.

NEXT ACTION / OWNER / DATE

IT lead: agree handover and learning time; W2.

2.6 Capacity & continuity

Who has time to review, maintain and support the system? Name backups and unresolved skill bottlenecks.

STATUS - Gap Added prompt

CAPACITY / SUPPORT / BACKUP OWNERS

Name support, incident and reviewer backups before a live pilot. No production support commitment yet.

+ STRENGTH / SUPPORTING EVIDENCE - GAP / CONSTRAINT

Small offline scope is manageable.

No live support rota or budget.

NEXT ACTION / OWNER / DATE

Sponsor: cost capacity and backups; W2.

For fine-tuning: name data-curation and model-evaluation skills. For agents: include integration and permission-testing expertise.

TAKE TO THE OVERVIEW: main decision / reason / dependency on another dimension

Retain domain and evaluation ownership internally. The planned team combines procurement, engineering and IT; reviewer and support capacity constrain delivery (3).

PRIORITY GAP OR UNKNOWN / NEXT STEP / OWNER / DATE

Sponsor and IT lead: assign evaluation capacity and backups by W2; reserve buyer/engineer review time in W1.

Structure, delivery and portfolio
PROJECT / OPPORTUNITY / PEOPLE / DATE

FICTIONAL TEACHING EXAMPLE | Procurement comparison | Planned offline experiment | W1-W3 = relative project weeks | No measured results

For each card: choose a status, record your decision and evidence, then identify a strength (+), gap (-) and next action.

3.1 Position the team

Centralised, distributed or hub-and-spoke? Which arrangement enables shared expertise and access across departments?

STATUS + Supported Paper III-D

TEAM STRUCTURE / CROSS-TEAM DEPENDENCIES

Use procurement ownership with shared IT/security expertise: a small hub-and-spoke arrangement.

+ STRENGTH / SUPPORTING EVIDENCE - GAP / CONSTRAINT

Business and technical roles clear.

Cross-team availability uncertain.

NEXT ACTION / OWNER / DATE

Sponsor: confirm shared-team allocation; W1.

3.2 Decision authority

Who owns budget, outcomes and access? Which people must be involved to avoid delays and unclear responsibility?

STATUS + Supported Paper III-D

SPONSOR / DECISION RIGHTS / ESCALATION

Procurement lead sponsors offline exploration. Live data and rollout need data, security and IT decisions.

+ STRENGTH / SUPPORTING EVIDENCE - GAP / CONSTRAINT

Decision owners are identified.

Live approval evidence absent.

NEXT ACTION / OWNER / DATE

Sponsor: document review gate; W1.

3.3 Portfolio & timing

Balance near-term improvements and longer-term exploration. Which projects share capabilities or compete for resources?

STATUS ? Unknown Paper III-D

PORTFOLIO ROLE / TIMING / SHARED INVESTMENT

Compare quote assistance with stock alerts and supplier-data cleanup. Defer autonomous ordering.

+ STRENGTH / SUPPORTING EVIDENCE - GAP / CONSTRAINT

Several routes to the business goal.

Relative value not measured.

NEXT ACTION / OWNER / DATE

Procurement lead: compare alternatives; W1.

3.4 Existing service or product

Could software or AI as a service meet the need? Consider configuration, provider dependence and price changes.

STATUS ? Unknown Paper III-D

SERVICE OPTIONS / FIT / DEPENDENCY

Check existing purchasing-platform features before custom work. Assess exports, terms and price dependence.

+ STRENGTH / SUPPORTING EVIDENCE - GAP / CONSTRAINT

Existing platform is a comparator.

Feature fit not checked.

NEXT ACTION / OWNER / DATE

IT + buyer: review platform capability; W1.

3.5 Build, partner or acquire

Compare internal development, outsourcing and acquiring technology. Consider retained knowledge and maintenance.

STATUS ? Unknown Paper III-D

DELIVERY CHOICE / RETAINED RESPONSIBILITY

Compare configuration, internal build and external development. Select after task and lifecycle-cost checks.

+ STRENGTH / SUPPORTING EVIDENCE - GAP / CONSTRAINT

Multiple delivery options remain.

No costed delivery proposal.

NEXT ACTION / OWNER / DATE

Project lead: compare three options; W2.

3.6 Agility & operations

What small prototype would resolve uncertainty? Involve users early; plan iterations, releases and ongoing operation.

STATUS + Supported Paper III-D

NEXT EXPERIMENT / REVIEW GATE / OPERATIONS OWNER

Run an offline experiment first, then review evidence. Keep the existing buyer process throughout.

+ STRENGTH / SUPPORTING EVIDENCE - GAP / CONSTRAINT

A bounded next step is defined.

Deployment evidence still needed.

NEXT ACTION / OWNER / DATE

Evaluation owner: prepare experiment plan; W1.

Keep application delivery separate from model sourcing and hosting. A system built internally can still depend on an external model.

TAKE TO THE OVERVIEW: main decision / reason / dependency on another dimension

Procurement owns the business decision; shared IT/security supports. Compare delivery routes before selection. Keep the offline scope and manual process while evidence develops.

PRIORITY GAP OR UNKNOWN / NEXT STEP / OWNER / DATE

Project lead: cost three delivery options in W2. Sponsor: decide on any next-stage proposal only after W3 evidence.

Models, people and deployment
PROJECT / OPPORTUNITY / PEOPLE / DATE

FICTIONAL TEACHING EXAMPLE | Procurement comparison | Planned offline experiment | W1-W3 = relative project weeks | No measured results

For each card: choose a status, record your decision and evidence, then identify a strength (+), gap (-) and next action.

4.1 Approach & simpler baseline

Could rules, optimisation or ordinary software solve the task? Compare predictive, generative and hybrid approaches.

STATUS

? Unknown

Paper III-E

APPROACH / SIMPLEST COMPARATOR / REASON

Compare the buyer template, a controlled LLM workflow and open-weight options. Use deterministic calculations.

+ STRENGTH / SUPPORTING EVIDENCE

Simple baseline already defined.

- GAP / CONSTRAINT

No candidate comparison run.

NEXT ACTION / OWNER / DATE

Evaluation owner: implement baseline; W2.

4.2 Model sourcing & adaptation

Use an existing model, adapter, fine-tuning or custom training? What task evidence, data, licences and skills justify it?

STATUS

? Unknown

Added prompt

MODEL / ADAPTATION / EVIDENCE NEEDED

Do not train from scratch. Consider an adapter only if evaluation reveals a stable gap and permitted data exist.

+ STRENGTH / SUPPORTING EVIDENCE

Adaptation can be deferred.

- GAP / CONSTRAINT

Task gap and data need unknown.

NEXT ACTION / OWNER / DATE

Model lead: classify errors before adapting; W3.

4.3 Performance & explainability

What must users understand or verify? Compare candidate performance and explanation needs on the actual task.

STATUS

? Unknown

Paper III-E

PERFORMANCE TRADE-OFF / REQUIRED EXPLANATION

Require quote citations and visible calculations. Evaluate field accuracy and reviewability together.

+ STRENGTH / SUPPORTING EVIDENCE

Evidence can be traced to quotes.

- GAP / CONSTRAINT

Users have not tested the display.

NEXT ACTION / OWNER / DATE

Buyer + engineer: review prototype; W2.

4.4 Human involvement

Who labels or corrects examples? Which tasks are augmented or automated, and which judgements remain with people?

STATUS

+ Supported

Paper III-E

HUMAN/MODEL DIVISION / REVIEW REQUIREMENT

Buyer checks drafts; engineer decides suitability. No automatic substitution, supplier message or order.

+ STRENGTH / SUPPORTING EVIDENCE

Human decisions explicitly scoped.

- GAP / CONSTRAINT

Review effort not yet measured.

NEXT ACTION / OWNER / DATE

Buyer: trial review rubric; W2.

4.5 Hosting & infrastructure

Compare cloud, managed service, on-premises and edge. Include training/inference needs, capital and operating costs.

STATUS

? Unknown

Paper III-E

HOSTING / COMPUTE / COST / SUPPORT

Compare approved hosted and internal options on data handling, cost, latency and support capability.

+ STRENGTH / SUPPORTING EVIDENCE

Only test data needed initially.

- GAP / CONSTRAINT

No hosting option approved.

NEXT ACTION / OWNER / DATE

IT + data owner: compare deployments; W2.

4.6 Integration & lifecycle

How do inputs and outputs connect to work? Define versioning, updates, monitoring, fallback and action boundaries.

STATUS

- Gap

Added prompt

INTEGRATION / CHANGE CONTROL / BOUNDARIES

Offline read/compare/draft only. No send, payment, vendor-write or live-order tools; record versions and logs.

+ STRENGTH / SUPPORTING EVIDENCE

Narrow boundary is specified.

- GAP / CONSTRAINT

Independent denial tests pending.

NEXT ACTION / OWNER / DATE

IT/security: verify restricted access; W2.

For LLMs: compare retrieval and adaptation. For agents: list permitted tools/actions and approvals enforced outside the model.

TAKE TO THE OVERVIEW: main decision / reason / dependency on another dimension

Use the simplest effective controlled workflow. No model/provider selected and no adaptation approved. Hosting depends on data terms (1); rollout depends on tests (5/6).

PRIORITY GAP OR UNKNOWN / NEXT STEP / OWNER / DATE

IT/security: verify read-only test access and denied actions in W2. Model lead: classify observed errors before proposing fine-tuning.

Outcomes, measurement and continuation
PROJECT / OPPORTUNITY / PEOPLE / DATE

FICTIONAL TEACHING EXAMPLE | Procurement comparison | Planned offline experiment | W1-W3 = relative project weeks | No measured results

For each card: choose a status, record your decision and evidence, then identify a strength (+), gap (-) and next action.

5.1 Strategic outcome

What organisational goal should improve? Choose a primary outcome with a baseline, target and time horizon.

STATUS ? Unknown Paper III-F

OUTCOME / BASELINE / TARGET / HORIZON

Test useful, accurate comparisons with less buyer effort. Offline work cannot establish fewer stockouts.

+ STRENGTH / SUPPORTING EVIDENCE - GAP / CONSTRAINT

Business objective is explicit.

Current effort baseline missing.

NEXT ACTION / OWNER / DATE

Buyer: time template comparisons; W2.

5.2 Customer & user value

Could value mean better service, easier decisions or a new offering? Who benefits and how will you observe it?

STATUS ? Unknown Paper III-F

BENEFICIARY / VALUE MEASURE / TARGET

Buyers should locate evidence and unresolved questions faster. Ask whether the comparison helps decisions.

+ STRENGTH / SUPPORTING EVIDENCE - GAP / CONSTRAINT

Intended users can review outputs.

Usefulness is not yet observed.

NEXT ACTION / OWNER / DATE

Research owner: collect buyer feedback; W3.

5.3 Process & people

Measure time, quality, rework and workload across the whole workflow. Where will released capacity be used?

STATUS ? Unknown Paper III-F

PROCESS MEASURE / BASELINE / CAPACITY USE

Measure total review and rework time on matched cases. Require lower median time without worse constraint checks.

+ STRENGTH / SUPPORTING EVIDENCE - GAP / CONSTRAINT

Comparator and workflow specified.

Time savings remain hypothetical.

NEXT ACTION / OWNER / DATE

Evaluation owner: log end-to-end time; W3.

5.4 Financial value

Consider revenue, margin, investment and ongoing costs. Separate staff capacity from realised cash savings.

STATUS ? Unknown Paper III-F

COST/BENEFIT / ASSUMPTIONS / BREAK-EVEN

Include integration, labelling, hosting, review and support. Treat released time separately from cash savings.

+ STRENGTH / SUPPORTING EVIDENCE - GAP / CONSTRAINT

Cost categories are identified.

Volumes and costs unmeasured.

NEXT ACTION / OWNER / DATE

Sponsor: prepare cost ranges; W2.

5.5 Model performance

Choose task-appropriate measures. Test unseen data, consequential errors and variation across relevant groups or periods.

STATUS ? Unknown Paper III-F

METRIC / COMPARATOR / TEST SET / THRESHOLD

Use 30 held-out packages. Target 95% critical-field accuracy; flag all test conflicts/expired quotes; review errors.

+ STRENGTH / SUPPORTING EVIDENCE - GAP / CONSTRAINT

Illustrative rubric is specified.

No results; small exploratory set.

NEXT ACTION / OWNER / DATE

Engineer + buyer: annotate fixed tests; W2.

5.6 Evidence & review

Who collects each measure, when and from which source? What result would support continuing, changing or stopping?

STATUS ? Unknown Paper III-F

EVIDENCE SOURCE / REVIEW DATE / DECISION RULE

Repeat 10 packages three times. Report counts, variation and errors; sponsor reviews quality/time/cost before pilot.

+ STRENGTH / SUPPORTING EVIDENCE - GAP / CONSTRAINT

Decision rule can precede testing.

No completed evaluation report.

NEXT ACTION / OWNER / DATE

Evaluation owner: report results and limits; W3.

For generators: use task rubrics and review effort. For agents: measure completed work and action errors, not just answer quality.

TAKE TO THE OVERVIEW: main decision / reason / dependency on another dimension

Predefine exploratory thresholds, compare matched cases and report denominators. Quality and total review time drive the next decision; stockout benefits require later observation.

PRIORITY GAP OR UNKNOWN / NEXT STEP / OWNER / DATE

Evaluation owner: separate development/test material by W2; report results and limits in W3. Do not turn targets into claimed outcomes.

Uncertainty, trade-offs and SWOT
PROJECT / OPPORTUNITY / PEOPLE / DATE

FICTIONAL TEACHING EXAMPLE | Procurement comparison | Planned offline experiment | W1-W3 = relative project weeks | No measured results

For each card: choose a status, record your decision and evidence, then identify a strength (+), gap (-) and next action.

6.1 Performance uncertainty

What if the desired accuracy is unattainable or conditions change? What prototype could expose this early?

STATUS ? Unknown Paper III-G.1

UNCERTAINTY / TEST / PIVOT OR STOP CONDITION

Test unseen quote formats, units and missing evidence. Pause if a critical constraint is missed; narrow scope.

+ STRENGTH / SUPPORTING EVIDENCE - GAP / CONSTRAINT

Offline tests permit revision. Generalisation is unmeasured.

NEXT ACTION / OWNER / DATE

Engineer: add boundary cases; W2.

6.2 Bias, ethics & safety

Who could be disadvantaged or harmed? Consider historical bias, missed errors and responsibility for consequences.

STATUS ? Unknown 2021 + extension

AFFECTED PEOPLE / HARM / REVIEW OR RECOURSE

Exclude safety-critical parts and substitutions. Check whether presentation style biases ranking; allow challenge.

+ STRENGTH / SUPPORTING EVIDENCE - GAP / CONSTRAINT

Engineering review is retained. Bias and review burden untested.

NEXT ACTION / OWNER / DATE

Buyer + engineer: compare document styles; W2.

6.3 Security & resilience

What deceptive inputs, data access or compromised components could cause harm? How will you detect and contain it?

STATUS - Gap 2021 + extension

THREAT / CONTROL / RESPONSE OWNER

Assess leakage through provider training, logs and tools. Test malicious inputs and blocked destinations. Prevent unapproved uploads; revoke access and investigate incidents.

+ STRENGTH / SUPPORTING EVIDENCE - GAP / CONSTRAINT

No external communication needed. Training terms and access tests open.

NEXT ACTION / OWNER / DATE

Security: run access and injection tests; W2.

6.4 Strategic dependence

How exposed are we to unfamiliar technology, skill gaps, vendors, price changes or organisational dependencies?

STATUS ? Unknown Paper III-G.1

DEPENDENCY / EXPOSURE / MITIGATION

Track provider changes, staff dependence and exportability. Preserve test cases and a manual fallback.

+ STRENGTH / SUPPORTING EVIDENCE - GAP / CONSTRAINT

Manual process remains available. Exit cost and terms unknown.

NEXT ACTION / OWNER / DATE

IT: assess export and switching options; W2.

6.5 Benefits & acceptable risk

Compare expected value with the size and reversibility of possible losses. Who can accept the remaining exposure?

STATUS ? Unknown Paper III-G.2-3

BENEFIT / DOWNSIDE / RISK TREATMENT / OWNER

Explore faster comparisons without granting purchasing authority. Sponsor accepts only the bounded test scope.

+ STRENGTH / SUPPORTING EVIDENCE - GAP / CONSTRAINT

Potential buyer capacity benefit. Live residual risk not accepted.

NEXT ACTION / OWNER / DATE

Sponsor: review evidence before live scope; W3.

6.6 SWOT & portfolio fit

Bring the findings together: internal strengths and weaknesses; external opportunities and threats. What changes the choice?

STATUS ? Unknown Paper III-G.3

S: ... W: ... O: ... T: ... / IMPLICATION

S: domain expertise. W: uneven data. O: reusable supplier records. T: provider change. Prioritise data and evaluation.

+ STRENGTH / SUPPORTING EVIDENCE - GAP / CONSTRAINT

Domain knowledge; reusable data. Data variation; provider exposure.

NEXT ACTION / OWNER / DATE

Sponsor: compare scope against SWOT; W2.

For agents: test prompt injection, tool misuse and reach into other systems. For predictive models: test drift and adversarial inputs.

TAKE TO THE OVERVIEW: main decision / reason / dependency on another dimension

Explore a bounded test; do not approve purchasing autonomy. Independent controls and human judgement address different failures. SWOT supports investment in data and evaluation first.

PRIORITY GAP OR UNKNOWN / NEXT STEP / OWNER / DATE

Security and engineer: test boundaries and errors in W2. Sponsor: explicitly review remaining exposure before any live pilot.

Participation, literacy and lasting use
PROJECT / OPPORTUNITY / PEOPLE / DATE

FICTIONAL TEACHING EXAMPLE | Procurement comparison | Planned offline experiment | W1-W3 = relative project weeks | No measured results

For each card: choose a status, record your decision and evidence, then identify a strength (+), gap (-) and next action.

7.1 AI literacy

What should leaders, users and wider staff understand about AI capabilities, limitations and appropriate uses?

STATUS ? Unknown Paper III-H

AUDIENCE / LEARNING NEED / DEMONSTRATION

Teach buyers, engineers and managers what the system can support, what it cannot verify and when to escalate.

+ STRENGTH / SUPPORTING EVIDENCE - GAP / CONSTRAINT

Role-specific tasks are known.

Practice materials not prepared.

NEXT ACTION / OWNER / DATE

Training owner: draft short exercises; W2.

7.2 Roles & empowerment

How will work and authority change? Discuss concerns, preserve useful expertise and identify where AI supports people.

STATUS ? Unknown Paper III-H; III-E

ROLE CHANGE / BENEFIT / CONCERN TO ADDRESS

Shift field extraction toward exception review. Preserve buyer judgement and engineering expertise; discuss workload.

+ STRENGTH / SUPPORTING EVIDENCE - GAP / CONSTRAINT

People keep authority to reject.

Impact on workload not observed.

NEXT ACTION / OWNER / DATE

Procurement lead: discuss role changes; W2.

7.3 Participation & ideas

How can staff help identify opportunities, shape the workflow and challenge unhelpful designs?

STATUS + Supported Paper III-H

PARTICIPANTS / CO-DESIGN OR FEEDBACK ROUTE

Include buyers and engineers in prototype reviews. Log corrections, confusing prompts and reasons for non-use.

+ STRENGTH / SUPPORTING EVIDENCE - GAP / CONSTRAINT

Relevant users are identified.

Feedback sessions not scheduled.

NEXT ACTION / OWNER / DATE

Project lead: book co-design session; W1.

7.4 Shared expertise

Would a centre of excellence or lighter community help? Decide how knowledge, examples and specialists are shared.

STATUS ? Unknown Paper III-H

SHARED SUPPORT / KNOWLEDGE OWNER / ACCESS

Use a shared project space and IT support contact. Reuse data definitions and tests before creating a larger centre.

+ STRENGTH / SUPPORTING EVIDENCE - GAP / CONSTRAINT

Existing IT support can be used.

Knowledge curator not assigned.

NEXT ACTION / OWNER / DATE

IT lead: assign documentation owner; W2.

7.5 Continuous education

Plan ongoing learning for developers, managers and users. Who updates guidance as systems and tasks change?

STATUS ? Unknown Paper III-H

TRAINING CADENCE / OWNER / UPDATE TRIGGER

Review learning needs weekly during the pilot; refresh guidance after model, specification or permission changes.

+ STRENGTH / SUPPORTING EVIDENCE - GAP / CONSTRAINT

Change triggers are identifiable.

Training time not yet funded.

NEXT ACTION / OWNER / DATE

Sponsor: reserve learning capacity; W2.

7.6 Adoption in practice

What does confident, appropriate use look like? Test realistic tasks; monitor burden, correction and reasons for non-use.

STATUS ? Unknown Added prompt

PRACTICE TASK / ADOPTION EVIDENCE / SUPPORT

Practise ambiguous quotes and malicious text. Track correction burden and appropriate rejection, not usage alone.

+ STRENGTH / SUPPORTING EVIDENCE - GAP / CONSTRAINT

Realistic practice cases proposed.

Readiness has not been observed.

NEXT ACTION / OWNER / DATE

Training owner: observe practice reviews; W3.

Tailor practice to the system: interpreting forecasts, checking generated content, or supervising and stopping delegated actions.

TAKE TO THE OVERVIEW: main decision / reason / dependency on another dimension

Involve users before rollout and teach evidence checking through practice. Adoption means appropriate use and manageable workload; increased usage alone is not success.

PRIORITY GAP OR UNKNOWN / NEXT STEP / OWNER / DATE

Training owner: prepare exercises in W2 and observe practice in W3. Sponsor: fund ongoing learning and act on feedback.
